

The Malaysian National Oil Company (NOC) Procedures and Guidelines for Upstream Activities (PPGUA) is one of the most important documents for operating companies in Malaysia.

Due to its huge scope, new revisions to the PPGUA are major undertakings involving input from all major domestic and foreign operating companies in Malaysia.

PetroEDGE was engaged as a technical writing service provider for the third revision of the PPGUA in 2013. For the PPGUA 3.0, PetroEDGE was contracted to:

- ✓ Turn drafts into smooth, tight writing that eliminates verbosity and results in easier reading and better understanding
- ✓ Edit written material for clarity, flow and unobtrusive grammar
- ✓ Design a new format for the full set of volumes (10 volumes in all)
- ✓ Develop a User Manual for the document (Volume 1)
- ✓ Work closely with the Secretariat for clarification, reviews and feedback
- ✓ Provide updates on work progress to the Secretariat as per the agreed timeframe
- ✓ Provide hard copies for periodical review and finally publish the finished document.

Content of PPGUA 3.0,
featuring 10 volumes:
